

## News Release 2009-02

STOLL-front loader FC – new front loader for compact tractors.

New STOLL frontloader ROBUST FC – completely new series for the compact-tractor class ranging from 10 to 50 HP

Lengede, March 2009

Stoll now offers also a complete programme of 3 separate front loaders especially for the compact tractor class ranging from 10- 50 HP. The series FC 250, FC 350 and FC 450 are in production now without parallel linkage and the model FC 450P with mechanical parallel linkage. The two smaller models will be equipped with implements which are fastened to the lifting arm by bolts, whereas the FC 450H and FCT 450P will be furnished with quick-fit-frames for the implements. The loader FCT 350 and FC 450 can be supplied with a 3rd function. To start with, Stoll offers a range of buckets, manure forks, pallet forks and bale spikes. This range will be enlarged continuously in the next time.

Stoll will be able to supply those starting from May 2009 for the suitable tractor from Deutz-Fahr, Same and Lamborghini. At present, the adaptations for the tractors from CNH, New Holland, CaseIH and Kubota are under process. Further are to follow. Stoll has made this decision to enlarge the marketing- and sales prospects of this new front loader series for the compact series and expects an increasing demand for the corresponding front loaders.

Deutz-Agrokid

FC 450 P
