

## Press release

Lengede, 20.07.2011

### Company Ott - new distributor for front loaders

With effect of 01.09.2011, Ott Landmaschinen AG is the new distributor for Stoll front loaders for the whole of Switzerland. From this date, Ott will take over responsibility for all sales and service related questions and issues.

“Wilhelm Stoll Maschinenfabrik wants to reach a bigger market presence in Switzerland. Being represented in all four language areas of Switzerland is very important to us,” said Steffen Krippahl, Sales Director at Stoll. “With Ott Landmaschinen AG we gained a tractor independent partner, which has a dense dealer network throughout Switzerland.”

The company, which was founded in 1806, is one of the most experienced enterprises in the area of agricultural machinery in Switzerland. Ott as a Swiss market leader for tractor machine attachments offers innovative solutions for agricultural and communal use.

STOLL has been building its front loader since 1965, and is globally one of the leading suppliers in the market today. With the **ProfiLine**, **EcoLine** and **CompactLine** model series, Stoll now offers a suitable front loader for every tractor. In agriculture, in particular the ProfiLine **FZ** model series including the Z Kinematik equipment caused a big stir. Once again the STOLL engineers succeeded in advancing well proven technologies by incorporating entirely new solutions, and developed another innovative, high-performance front loader. The new STOLL products and their technological benefits have been very well accepted by the market. In the first 8 months of the current business year, STOLL registered an increase in received orders of 24.9% in the sales of front loaders compared with the previous year.
